

CN-1800S & CN-2400S

Contractor Series SmartSequencers

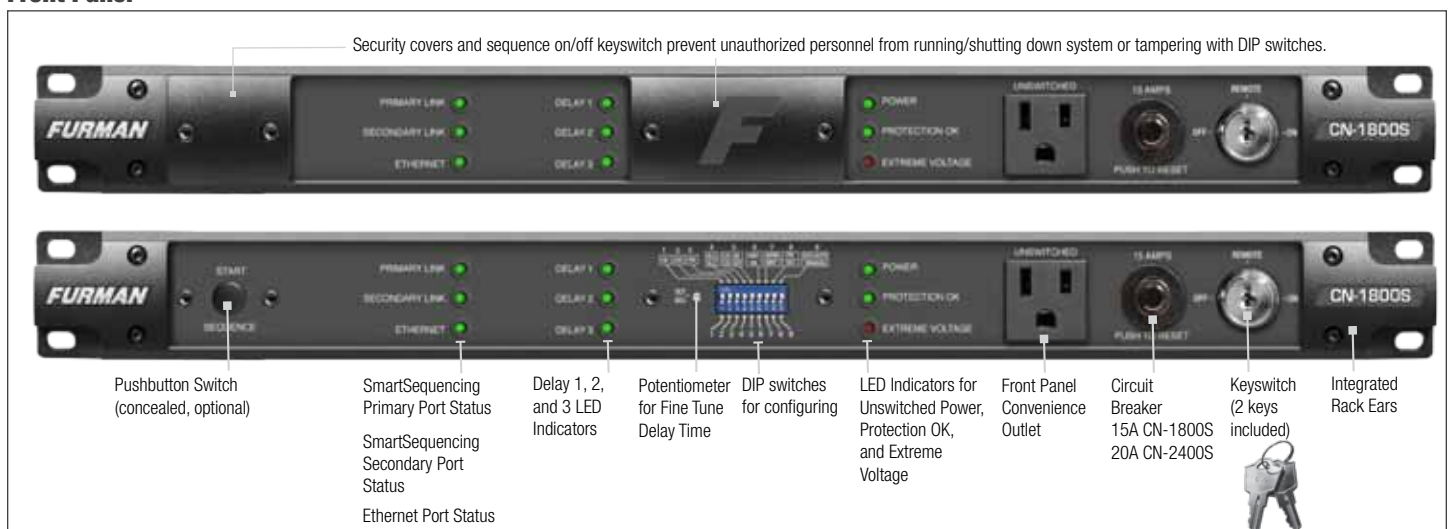

Furman's SmartSequencers combines AC power distribution, protection, filtration, and sequential system power on/off in a 1RU, 120VAC, rack-mount unit.

Features

- SmartSequencing technology allows large and complex A/V systems to be safely powered on and off with a simple press of a button or turn of a key, even by non-technical personnel.
- Multiple units may be daisy chained at runs of over 1,000' between units with bi-directional communications between units for sequencing on and off large and/or complex systems.
- RS-232 compatibility and command set provide integration with control systems, optional RS-232-to-Ethernet adaptor allows for control, programming, & monitoring from any Web-enabled device via Telnet, direct HTTP connection, or Panamax/Furman's BlueBOLT® platform.
- Series Multi-Stage Protection (SMP) ensures zero downtime for mission-critical installations by safely absorbing, clamping and dissipating transient surges and spikes without damage to internal circuitry or connected equipment.
- Extreme Voltage Shutdown (EVS) safeguards from catastrophic under-voltage (under 80V sustained) or over-voltage (over 145V sustained) conditions. Circuit may be set to auto-reset when voltage returns to normal or manual reset after an event is detected.
- Linear Filtering Technology (LiFT) ensures maximum performance from connected equipment by reducing AC noise evenly across the audio & video bandwidth.
- Security covers and sequence on/off keyswitch prevent unauthorized personnel from running/shutting down system or tampering with DIP switches.
- Fire alarm shut off.
- Available with 15 amp capacity (CN-1800S) or 20 amp capacity (CN-2400S).
- 15 Year Limited Product Warranty. See warranty policy documentation for terms and conditions.
